CARTON (PAPER) CORNER

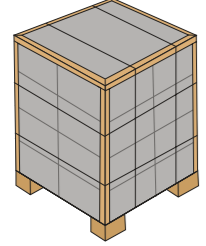

Vertical Usage

It increases the pallet of resistance and it prevents the packaged products from crushing and dispersing when they are loaded and transport.

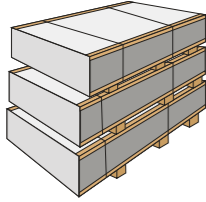

Horizontal Usage

It saves space by giving opportunity in order to overlapping 2 or 3 pallets during transportation and stocking.

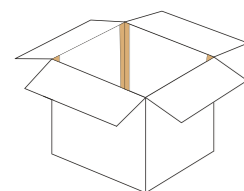

Vertical and Horizontal Usage

It protects vertical corners, horizontal corners and top corners. It increases vertical carrying resistance.

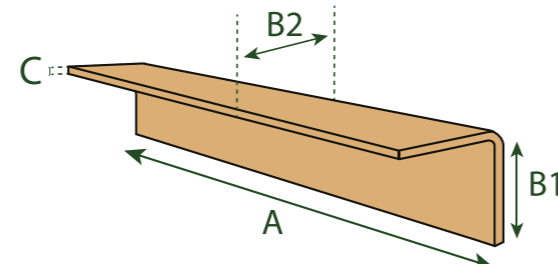

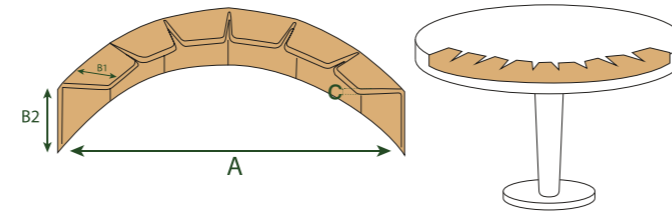

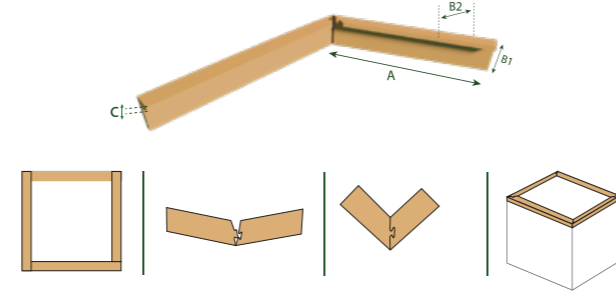

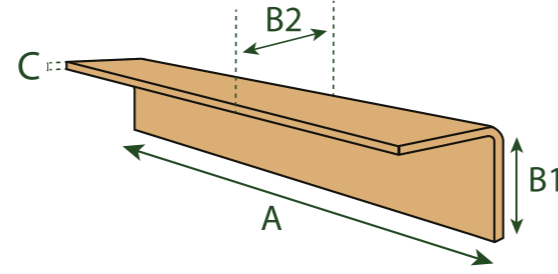

Horizontal Usage

It prevents products and products and product packaging from damaging during strapping.

Vertical Usage in The Box

It prevents the breakdown of the boxes and products from damaging, by using increased vertical resistance for corrugated cardboard box.

Paper Edge Protector

A(mm)	B1(mm)	B2(mm)	C(mm)
50-10.000	25-100	25-100	2-10

Lock Style Corner Protector

A(mm)	B1(mm)	B2(mm)	C(mm)
100-4000	30-60	30-60	3-50

It can be implemented easily with locking system like a puzzle. It is used by all of sectors especially white goods sector and electronic goods sector in order to overlapping items or pallets during transportation or stocking.

Wrap Around Edge Protector

A(mm)	B1(mm)	B2(mm)	C(mm)
300-10.000	25-75	25-75	2-5

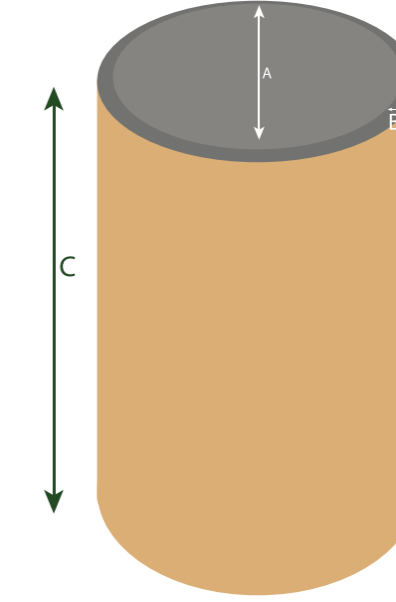

Wrap around edge board acts as an edge protective option for the Round Shape Material. The innovative design of this edge board reduces product damage during transportation and storage. Apart from improving load stability

Moisture Resistant Edge Protector

A(mm)	B1(mm)	B2(mm)	C(mm)
Opsiyonel	25-100	25-100	2-10

Moisture Resistant edge protector is generally preferred by fruit and vegetable producers which need to stock their products in cold storage. It can be printed by using 5 different colours according to customers' request.

CYLINDRICAL PRODUCTS

Reel Bobbin

Its task is carrier for various fabric and synthetic goods which be size customers request (inner diameter is between Q30 and Q70 mm) in textile industry.

Paper Core Tube

It uses as a carrier which being at Q78,8 mm, 100 mm and 152 mm for paper dough, gray cardboard, kroma carton, kraft liner, test liner and fluting in paper industry. Also it is used as a carrier with smooth surface which being at Q78,8 mm and 152 mm, in plastic and packaging industry.

Stretch and Shrink Coil

It is used as a carrier which being at Q50 mm for Stretch film (between 10cm and 600cm) and Q76,8 mm for shrink (between 7cm and 600cm) in plastic industry.
